Notification Screen

**Step 5:** To check enable COM port number

## E. Important Remarks

1. If your system is Windows Millennium, please refer to Windows 98 installation guide. If your system is Windows 2000, please refer to Windows XP installation guide.
2. If you follow the steps but the GPS receiver doesn't work, please try to unplug the GPS receiver from the USB port, wait for 5~8 seconds, and re-plug the GPS receiver into your PC.
3. Occasionally the mouse cursor does not work properly when you run the Win2000 and Win XP, and this situation is owing to Win2000 and Win XP operating system instead of the GPS receiver. Microsoft announces that this situation is "the serial device may be detected as a serial mouse in Win2000 and Win XP".
4. If your GPS receiver is recognized as a Microsoft serial mouse, there are two ways and you can choose either one to solve the problem. The first is to unplug the GPS receiver from PC, wait for 5~8 seconds, and re-plug the GPS receiver into your PC. The second is to disable this serial mouse; you can follow the step-by-step instructions below.

Click "start" → click "Control Panel" → double-click "system" icon → click "Hardware" → click "Device Manager" → click "Mouse" → select the wrong mouse → click your real mouse right button → disable the wrong mouse.

Should you have any additional question regarding the operation of Ever More USB GPS receiver, please feel free to contact your correspondent sales representative. It is important that you record what problems you encounter and what error messages occur at that point, so that the technical support people can detect your problems more efficiently.
